

Ensuring Transparency in the Age of AI

Artificial intelligence generates millions of synthetic videos. While this enables innovation, it also fuels scams and misinformation.

AI SECURE GLOBAL LTD proposes a clear solution: every AI-generated video must display an unmistakable, tamper-resistant disclosure mark - the AI SECURE(R) watermark.

Policy Recommendation:

Governments should adopt laws enforcing this standard. Platforms and creators should adopt it immediately.

Join Us:

AI SECURE GLOBAL LTD invites governments, platforms, and creators to work together for a transparent AI future.
